SHOW PLOTS

Best judges [Queue](#) [Print](#)

The same candidates in three presentation orders

Candidates [1](#) [2](#) [3](#) [4](#) [5](#) [6](#) mark each judge plot; [5](#) marks the human-best image; numbers are alignment scores

	Plot A	Plot B	Plot C
Order 1 original			
	SD-3.1 0.50	Flux 0.50	GPT-3.5-Large 0.50
Order 2 permutated			
	Flux 0.50	GPT-3.5-Large 0.50	SD-3.1 0.50
Order 3 permutated			
	Flux 0.50	GPT-3.5-Large 0.50	SD-3.1 0.50

[Open](#) picks the same image in 1 of 3 prompts [Best](#) picks the same image in 2 of 3 prompts

Unanimity gate

Answer GPT's pick only if it's the same in all three

Order: [SD-3.1](#), [Flux](#), [GPT-3.5-Large](#)

Rejects

Cross-modal gate

Answer the text prompt (C) and GPT's pick in the original

Order: [chocolate](#), [SD-3.5-Large](#), [Small](#), [chocolate](#), [Flux](#), [SD-3.1](#)

Rejects

Human ratings

Human vote percentages, 0–5. Alignment is the utility (higher is better); stereotypes and missing elements are lower is better.

PROMPT	GENERATOR	ALIGNMENT	STEREOTYPE	MISSING ELEM.	MISSING INFO.
	SD-3.5-Large 2 prompts: 0.5, 0.5, 0.5	0.00	0.00	1.00	0.00
	Flux 1-Dev 2 prompts: 0.5, 0.5, 0.5	0.50	0.00	1.00	0.00
	GPT-3.5-Large 2 prompts: 1.0, 1.0, 0.5	0.83	0.00	0.33	0.00

Selection metrics, original order

A human plot would score 0.444 on average (plot C 0.333), the best image scores 0.833.

	SD-3.5-Large (plot A)	Flux 1-Dev (plot B)
Pos	0.00	0.500
Utility	0.000	0.500
Regret	0.833	0.333
Open over-random	-0.444	+0.556
Human-beat	yes	no
Stolen-most	no	no

Picks by order
